I'm a front-end expert with a deep understanding of React, TypeScript, JavaScript, HTML, CSS and other related technologies. With years of experience in front end development, I have the skills necessary to create exceptional digital experiences that users love.

I have been working in Agile environments with multidisciplinary teams, where I have had the opportunity to work in cross-functional teams and collaborate with designers, project managers, and back-end developers.

I am passionate about staying up-to-date with the latest trends and best practices in frontend development and am always seeking new challenges that enable me to grow and develop as a professional.

Skills

Front-end

- React
- JavaScript
- TypeScript

- HTML + CSS
- Jest + React Testing Library
- SASS

Soft Skills

- Communication
- Problem-solving
- Teamwork
- Adaptability

Work Experience

Freelancer
Software Engineer | Remote | May 2022 - Current

Shogun
Front-end Engineer | United States · Remote | Sep 2019 - Jan 2022

- I leveraged a variety of cutting-edge technologies, including JavaScript, React, TypeScript, GraphQL, Jest, and others, to develop and integrate numerous features for both Shogun Frontend and Page Builder.

- I was able to identify and replicate a wide range of bugs on Page Builder, which allowed me to promptly resolve them. This resulted in a notable increase in customer satisfaction, as well as a significant reduction in the volume of bug reports received.

- We implemented e-commerce solutions for our clients that significantly improve page load times, reducing the average page-to-page load time by 83%.

Ignus Digital

Front-end Developer | Brazil · Remote | Feb 2018 - Aug 2019

- I have successfully built several products using technologies such as React, Redux, GraphQL, JavaScript, HTML, CSS, SASS, and others.
- I have assisted clients and managers in identifying the most appropriate technologies for their specific project needs, resulting in successful delivery of effective solutions.
- I collaborated closely with designers and back-end developers to create exceptional user experiences including a Gantt chart where teachers could plan their classes.
